The diagram shows a vertical cable assembly. At the top is a square connector with five circular ports arranged in a cross pattern. To the left of the top-left and bottom-left ports are the labels 'orange' and 'grün' respectively. To the right of the top-right and bottom-right ports are the labels 'orange' and 'grün' respectively. The cable consists of five parallel conductors that pass through a series of three rectangular components (likely strain relief or ferrules) and terminate in a probe-like tip at the bottom.
